How To Text A Woman: Action Checklist

Using Mind Control In Texting

1. Women seem to behave unpredictably and irrationally sometimes, and this is caused by certain *vulnerabilities* which are hard-wired inside their minds.

2. By exploiting these psychological vulnerabilities, you'll be able to gain the upper hand and make any woman yield to your influence and control whenever you want.

3. **A woman's biggest psychological weakness is that she lets her emotions govern her actions.**

4. Once you have developed a superior understanding of how female psychology works, you'll be able to *"brute force"* a woman to develop feelings for you.

1. The best way to master the art of understanding (and exploiting!) a woman's psychological weakness is to use **Mind Control** techniques. For a **free** online Masterclass (conducted by Derek Rake, the founder of Shogun Method), click here.

Just Text Her Already!

- Stop overthinking or waiting for too long
- You won't need "perfect" words to text a woman (especially if you know Mind Control)
- Craft a short message which requires her to respond
- The "first text rule" - if she doesn't respond to your first text, then your chances of hitting it off with her later would be slim to none
- Use Fractionation to build emotional rapport with her quickly. For a useful guide on how Fractionation works, click here.

Just Text Her Already! (cont'd)

- Make her miss you – once you have established a "chain" of communication with her, stop replying her

- Be playful, and make full use of emojis or emoticons

- Practice the art of perfect timing; keeping busy (with other women!) will help your cause greatly

- Use Implanted Commands – see next page

Use Implanted Commands!

An Implanted Command is a phrase that forms the part of a sentence which if spoken on its own, it would be a *direct command*. The other phrases in the sentence would camouflage the Implanted Command so that it goes under the radar, undetected by your target's conscious mind.

You use an Implanted Command to make a suggestion to your target which is *automatically accepted* because she won't be noticing it consciously, making it *impossible* for her to evaluate (and reject) the suggestion.

Implanted Commands work wonderfully well over text!

Let's look at some examples…

An Example...

Here is an Implanted Command that you can use to ask her out…

"Sure, I can tell you that that by replying to this text and agreeing to meet me for dinner will change your life for the better, but I'd rather you experience it for yourself."

OR

"You'll never know if by simply replying to this text, you'll be telling your grandkids about our first date one day."

Why Does This Work?

The subconscious messages are "agree to meet me for dinner" and "telling your grandkids about our first date".

These messages are accepted by her mind without questioning because as Derek Rake says: **"what a woman can't detect, she can't resist".**

See how that works?

Implanted Commands are ideal for texting to women because the manipulator doesn't need to worry about delivery or body language. They can simply be delivered word for word!
